

ImageTool for the Web

Document Management

**ACCESS AND RETRIEVE DOCUMENTS VIA THE WEB
WHENEVER...WHEREVER**

Instant Access | Increased Security | Improved Communication

**ImageTool for the Web is a faster, more secure, less expensive
and easier way to share documents and data.**

ImageTool™ for the Web

ImageTool for the Web provides users the ability to access, retrieve and upload documents via the web. Any user on the Internet or Intranet can view documents with their browser without needing any additional software. ImageTool provides a secure, central, unified location for your documentation.

ImageTool for the Web sits on your company's web server and gives your organization the ability to have unlimited users, at minimal cost. While you still have the ability to retrieve, view, upload and print documents just as you would using ImageTool, you can now do all of this safely, quickly and easily over the web.

Security - Unique to ImageTool are it's "vaults," or secure document storage locations that are set up on the web server. Security settings ensure that only authorized users have access to files. This prevents unauthorized users from accessing confidential information.

Speed - Whether you are accessing one page or 10,000 pages, ImageTool for the Web will always provide you uncompromised speed.

Ease of Use - You do not need to be an expert on the web to use ImageTool for the Web. It is easy to learn and easy to use, and it supports all industry standards.

Benefits

- Secure your documents
- Enables you to remotely access and workflow any and all of the documents published
- Share information in seconds
- Increase productivity
- Reduces the costs of document distribution
- Ease of use
- Improved communication
